***Drawings***

1. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. The drawings submitted with the PCT are presented with French text. Applicant is required to submit copies of the drawing with the appropriate English text labels.

***Allowable Subject Matter***

2. Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to sufficiently describe or suggest an aircraft navigation aid method comprising of: defining an area to be sensed right and left of a first hypothetical path of the aircraft, designated as the feeler line path; sensing for each of the two areas a corresponding underlying relief, in order to identify dangerous sub-zones to the right and/or to the left; computing, for each dangerous sub-zone a time remaining to begin a avoidance maneuver before a point of no return, and determining for the dangerous sub-zones to the right and left, a minimum time; and establishing a navigation aid from the time remaining for the right and/or the time remaining for the left. These along with other limitations set forth by the claims render the application allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*
